-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. Receipt is acknowledged of the Information Disclosure Statement (IDS) received July 18, 2002.

Drawings

3. The drawings were received on May 14, 2001. These drawings are approved.

Specification

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2652

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Koichi (JP 59-087676). Koichi shows in figure a disk player in figure 1 that includes a main chassis for enclosing a play mechanism for playing disk 5. Shown in figure 4, for example, is receiving module 3 having a slot 16a in which disk 5 is inserted. A disk transfer mechanism, which includes "roller" 23, is also shown in figure 4 for transferring disk 5 inserted slot 16a. A disk detecting mechanism that includes detector 20 detects the position of disk 5 inserted.

Figures 5 and 6, for example, show the progression of a drive mechanism that includes link member 22 for moving receiving module 3 between a closed position and an opened position spaced from the closed position.

Figure 1, for example, shows the disk player including a switch mechanism (i.e an eject/open button) controlled by a user for issuing a drive starting command signal to start driving the drive mechanism. The disk detecting mechanism that includes switch 37, as shown in figures 4-6 that generates a detection signal when disk 5 arrives at a predetermined position. The drive mechanism that includes link member 22 moves receiving module 3 from the open position to the closed position in response to one of the detection signal from the detector 20 and the command signal from the switch mechanism.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is (703) 308-1503. The examiner can normally be reached on Monday thru Friday between 9:30-6:00.
